Subject index

A

Acetonide aerosols, triamcinolone, for asthma; effective replacement of systemic corticosteroid therapy (Falliers, C. J.), 1

Actinomycete(s) isolates, home humidifier thermophilic (Seabury, J., et al.), 174 (Brief communication)

thermophilic, immunologic cross-reactions among, associated with hypersensitivity pneumonitis (Kurup, V. P., et al.), 417

Adenoids of atopic and nonatopic patients, immunofluorescence studies on, *19* (Abst.)

Adrenal function in asthmatic children, total eosinophil count and, *30* (Abst.)

pituitary-function, evaluation of, in patients with chronic bronchial asthma following substitution of steroid treatment with disodium cromoglycate (Lomudal) (Kaufman, H., et al.), 267

Adrenergic blockade, beta, effect of, on bronchial sensitivity to acetyl-beta-methacholine in normal and allergic rhinitis subjects (Townley, R. G., et al.), 358

Adrenocorticosteroid therapy, daily and alternate-day, growth, pulmonary, and endocrine function in chronic asthma patients on, 430

Aeroallergen prevalence, volumetric studies of; pollens of weedy forbs at midwestern station (Solomon, W. R.), 318

Aerosols, triamcinolone acetonide, for asthma; effective replacement of systemic corticosteroid therapy (Falliers, C. J.), 1

Airway constriction induced by hemp dust extract, protective effect of disodium cromoglycate against (Zuskin, E., and Bouhuys, A.), 473

Allergen(s), Alternaria, studies on; establishment of radioallergosorbent test for measurement of (Yunginger, J. W., et al.), 293

Allergen(s)--Cont'd

-induced histamine release from whole blood, method utilizing; automated histamine analysis for in vitro allergy testing (Siraganian, R. P., and Brodsky, M. J.), 525

inhalation, inhibitory effect of oral doxantrazole on asthma induced by, *22* (Abst.)

major, in honeybee venom, phospholipase A; allergy to insect stings (Sobotka, A. K., et al.), 29

of mammalian origin; evidence for common allergens in cat and dog serum (Ohman, J. L., Jr., et al.), 560

Allergenicity and immunogenicity of Basidiomycetes (Lopez, M., et al.), 480

in vitro cross-, of major aeroallergenic pollens by radioallergosorbent technique (Bernstein, I. L., et al.), 141

Allergic, anti-, agent, doxantrazole, orally effective in man, *18* (Abst.)

responses, late cutaneous, induced by antiserum to human IgE, inhibition by prednisone of (Poothullil, J., et al.), 164 (Brief communication)

rhinitis, median age at onset of asthma and, in Tecumseh, Michigan (Schachter, J., and Higgins, M. W.), 342

patients with elevated IgE, competent cellular immunity in (Yocum, M. W., et al.), 384 (Brief communication)

with negative skin tests, local production of specific IgE antibodies in, *14* (Abst.)

subjects, normal and, effect of beta adrenergic blockade on bronchial sensitivity to acetyl-beta-methacholine in (Townley, R. G., et al.), 358

Allergy(ies), atopic, vitamin C metabolism and, *31* (Abst.)

January, pp. 1-88; February, pp. 89-188; March, pp. 189-284; April, pp. 285-390; May, pp. 391-512; June, pp. 515-648.

Abstracts: January, pp. *1-8;* February, pp. *9-14;* March, pp. *15-20;* April, pp. *21-28;* May, pp. *29-34;* June, pp. *35-40.*

Allergy(ies)—Cont'd
clinical, possible asbestos hazards in (Bernstein, I. L., and Moteff, J.), 489 (Brief communication)
controversial techniques in, 625 (Correspondence)
egg, influenza vaccine, and immunoglobulin E antibody (Davies, R., and Pepys, J.), 373
to insect sting(s); allergenic cross-reactivity among vespid venoms (Kern, F., et al.), 554
phospholipase A: major allergen in honeybee venom (Sobotka, A. K., et al.), 29
in vitro antagonism of mediators of, by benzopyrano-benzopyran carboxylic acid PR-D-92-EA, *37* (Abst.)
miscellaneous, *18*, *28*, *32*, *37* (Absts.)
mites and house dust, *18* (Abst.)
to nuts, detection of, by radioallergosorbent test (Gillespie, D. N., et al.), 302
ragweed, relationship between HL-A antigens and lymphocyte response in (Yoo, T.-J., et al.), 25
stinging insect, whole body insect extracts in treatment of, immunological studies of effect of (Reisman, R. E., et al.), 547
testing, in vitro, automated histamine analysis for; method utilizing allergen-induced histamine release from whole blood (Siraganian, R. P., and Brodsky, M. J.), 525
tobacco smoke–induced, mechanism for (Keller, K. F., and Doyle, R. J.), 278
Alpha-1 antitrypsin levels and prevalence of Pi variant phenotypes in asthmatic children (Katz, R. M., et al.), 41
Alternaria allergens, studies on; establishment of radioallergosorbent test for measurement of (Yunginger, J. W., et al.), 293
IgG precipitins and adverse reactions (Busse, W. W., et al.), 367
Ambrosia elatior, studies on deterioration of antigen E in extracts of (Peddecord, K. M., et al.), 56
American Academy of Allergy, abstracts of papers given at annual meeting, 189-266
Anaemia, haemolytic, due to penicillin, *32* (Abst.)
Anaphylactoid purpura, selective deficiency of second component of complement in patient with, *16* (Abst.)
Anaphylaxis, *34* (Abst.)
Angioedema, chronic urticaria and, C1-bypass complement-activation pathway in patients with, *10* (Abst.)
hereditary, fresh frozen plasma for prophylaxis in, 624 (Correspondence)
Angioedema, hereditary—Cont'd
vibratory; confirmation of histamine release in type of physical hypersensitivity (Metzger, W. J., et al.), 605 (Brief communication)
urticaria, and low serum complement activity, hypersensitivity to procarbazine associated with (Glovsky, M. M., et al.), 134
Announcements, 188, 284, 389, 630
Anthranilic acid (N-5′), N(3′,4′-dimethoxycinnamoyl), inhibition of hypersensitivity reactions by new drug (Koda, A., et al.), 396
Antibiotic spiramycin, macrolide, asthma due to inhaled chemical agents, *28* (Abst.)
Antibody(ies), immunoglobulin E, egg allergy, influenza vaccine, and (Davies, R., and Pepys, J.), 373
to pollen allergens account for high percentages of total immunoglobulin E protein, *23* (Abst.)
mouse homocytotropic and heterocytotropic, properties of (Lehrer, S. B., and Vaughan, J. H.), 422
precipitating, in midwest dairy farming population toward antigens associated with farmer's lung disease (Roberts, R. C., et al.), 518
to ragweed, in vitro reaction of; radioimmunoassay for measuring antibody levels, *32* (Abst.)
response, Gm allotype, and mortality, correlation of, *12* (Abst.)
specific IgE, local production of, in allergic rhinitis patients with negative skin tests, *14* (Abst.)
in nasal secretion, measurement of; evidence for local production, *40* (Abst.)
suppression by cadmium, *13* (Abst.)
Antigen(s) associated with farmer's lung disease, precipitating antibodies in midwest dairy farming population toward (Roberts, R. C., et al.), 518
D immunotherapy, timothy, clinical and immunological studies of (Nelson, H. S., et al.), 463
E, polymerized ragweed; analysis of stability of molecular size and antigenic reactivity of polymer (Patterson, R., and Suszko, I. M.), 168 (Brief communication)
studies on deterioration of, in extracts of *Ambrosia elatior* (Peddecord, K. M., et al.), 56
HL-A, and lymphocyte response in ragweed allergy, relationship between (Yoo, T.-J., et al.), 25
-induced histamine release by ouabain, inhibition of (Okazaki, T., et al.), 454
from rat peritoneal mast cells, inhibition by nicotinamide of an homologous PCA reaction and, *24* (Abst.)

Antigen(s)—Cont'd
-specific IgE, calculations of, 512 (Correspondence)
Antitrypsin deficiency, alpha-1, severe obstructive lung disease in 14-year-old girl with (Dunand, P., et al.), 615 (Allergy grand rounds)
Arrhythmias, occurrence of, in hospitalized asthmatic patients (Grossman, J.), 310
Arthritis, rheumatoid, seronegative and seropositive, routine assay for detection of IgG and IgM antiglobulins in, *23* (Abst.)
Asbestos hazards, possible, in clinical allergy (Bernstein, I. L., and Moteff, J.), 489 (Brief communication)
Aspirin intolerance in chronic childhood asthma, *2* (Abst.)
refractory period to, in patient with aspirin-induced asthma (Zeiss, C. R., and Lockey, R. F.), 440
Asthma and allergic rhinitis, median age at onset of, in Tecumseh, Michigan (Schachter, J., and Higgins, M. W.), 342
aspirin-induced, refractory period to aspirin in patient with (Zeiss, C. R., and Lockey, R. F.), 440
bronchial, tryptophane metabolism in, *3* (Abst.)
bronchiolitis and; possible common pathogenetic pathways (McIntosh, K.), 595
childhood, oral and inhaled routes in, betamethasone valerate compared by (Frears, J., et al.), 391
chronic bronchial, evaluation of pituitary-adrenal function in patients with, following substitution of steroid treatment with disodium cromoglycate (Lomudal) (Kaufman, H., et al.), 267
childhood, aspirin intolerance in, *2* (Abst.)
due to inhaled chemical agents—macrolide antibiotic spiramycin, *28* (Abst.)
and hay fever, *2*, *16*, *22*, *30* (Absts.)
induced by allergen inhalation, inhibitory effect of oral doxantrazole on, *22* (Abst.)
inhaled corticosteroids compared with oral prednisone in patients starting long-term corticosteroid therapy for, *4* (Abst.)
patients, chronic, on daily and alternate-day adrenocorticosteroid therapy, growth, pulmonary, and endocrine function in (Shapiro, G. G., et al.), 430
postexercise bronchoconstriction in, effect of thymoxamine and cromolyn sodium on (Patel, K. R., et al.), 285
prostaglandins and: use of blood components for metabolic studies (Okazaki, T., et al.), 124
Asthma—Cont'd
triamcinolone acetonide aerosols for; effective replacement of systemic corticosteroid therapy (Falliers, C. J.), 1
Asthmatic children, alpha-1 antitrypsin levels and prevalence of Pi variant phenotypes in (Katz, R. M., et al.), 41
effect of treadmill exercise on (James, L., et al.), 408
total eosinophil count in (Blumberg, M. Z., and Buckley, J. M.), 493 (Brief communication)
and adrenal function in, *30* (Abst.)
treated with beclomethasone dipropionate, clinical and physiological assessment of (Lovera, J., et al.), 112
and normal subjects, comparison of respiratory and cardiovascular effects of isoproterenol, propranolol, and practolol in (Ryo, U. Y., and Townley, R. G.), 12
patients, heterogeneity of, individualized approach to diagnosis and treatment (Spector, S. L., and Farr, R. S.), 499 (Allergy grand rounds)
hospitalized, occurrence of arrhythmias in (Grossman, J.), 310
serum prostaglandin levels in (Nemoto, T., et al.), 89
population, steroid-treated, prevalence of tuberculosis and positive tuberculin skin tests in, *30* (Abst.)
Atopic dermatitis, defective T cell function in (Rachelefsky, G. S., et al.), 569
diagnosis and pathobiology (Blaylock, W. K.), 62

B

Bacteria and fungi associated with hypersensitivity pneumonitis, activation of complement sequence by extracts of (Marx, J. J., Jr., and Flaherty, D. K.), 328
Bactericidal activity, decreased, of leukocytes of stressed newborn infants, *17* (Abst.)
Basidiomycetes, allergenicity and immunogenicity of (Lopez, M., et al.), 480
Beclomethasone dipropionate, clinical and physiological assessment of asthmatic children treated with (Lovera, J., et al.), 112
Beta adrenergic stimulation and blockade, effect of, on cutaneous reactivity to histamine (Lamkin, N., Jr., et al.), 449
Betamethasone valerate compared by oral and inhaled routes in childhood asthma (Frears, J., et al.), 391
Blood cells, autologous and allogeneic human red, human T lymphocytes form rosettes with, *6* (Abst.)

Blood—Cont'd
components for metabolic studies, use of; prostaglandins and asthma (Okazaki, T., et al.), 124
Bovine SRS-A, modulation of formation and release of, in vitro by several anti-anaphylactic drugs, *34* (Abst.)
Bronchial asthma, chronic, evaluation of pituitary-adrenal function in patients with, following substitution of steroid treatment with disodium cromoglycate (Lomudal) (Kaufman, H., et al.), 267
tryptophane metabolism in, *3* (Abst.)
sensitivity, effect of beta adrenergic blockade on, to acetyl-beta-methacholine in normal and allergic rhinitis subjects (Townley, R. G., et al.), 358
Bronchiolitis and asthma; possible common pathogenetic pathways (McIntosh, K.), 595
Bronchoconstriction, exercise-induced and methacholine-induced, metabolic changes in (Soifer, M. M., et al.), 577
postexercise, in asthma, effect of thymoxamine and cromolyn sodium on (Patel, K. R., et al.), 285

C

Cadmium, antibody suppression by, *13* (Abst.)
Cancer patients, IgE levels in sera of (Winters, W. D., and Heiner, D. C.), 181
Carboxylic acid PR-D-92-EA, benzopyranobenzopyran, in vitro antagonism of mediators of allergy by, *37* (Abst.)
Cardiovascular effects, respiratory and, of isoproterenol, propranolol, and practolol, comparison of, in asthmatic and normal subjects (Ryo, U. Y., and Townley, R. G.), 12
Cat and dog serum, evidence for common allergens in; allergens of mammalian origin (Ohman, J. L., Jr., et al.), 560
Cell-mediated immunity to insulin and its polypeptide chains in insulin-treated diabetics, *5* (Abst.)
Cellular immune responsiveness, differential, to systems of major histocompatibility complex (Bach, F. H.), 95
Chemical agents, inhaled, asthma due to—macrolide antibiotic spiramycin, *28* (Abst.)
Chemotaxis of lymphoblasts, *14* (Abst.)
Childhood asthma, betamethasone valerate compared by oral and inhaled routes in (Frears, J., et al.), 391
Children, asthmatic, effect of treadmill exercise on (James, L., et al.), 408
total eosinophil count in (Blumberg, M. Z., and Buckley, J. M.), 493 (Brief communication)
treated with beclomethasone dipropionate, clinical and physiological assessment of (Lovera, J., et al.), 112
Clinical observation, inference on mean values and proportions of, 623 (Correspondence)
reactions and serologic response following inactivated monovalent influenza type B vaccine in young children and infants, *36* (Abst.)
Coccidioidomycosis, disseminated, cutaneous sensitivity and in vitro responsiveness of lymphocytes in patients with, *31* (Abst.)
Complement-mediated release of histamine from human leukocytes, *33* (Abst.)
Corticosteroid(s), inhaled, compared with oral prednisone in patients starting long-term corticosteroid therapy for asthma, *4* (Abst.)
therapy, systemic, effective replacement of; triamcinolone acetonide aerosols for asthma (Falliers, C. J.), 1
Corynebacterium parvum, suppression of cell-mediated tumor immunity by, *38* (Abst.)
Cromolyn sodium, effect of thymoxamine and, on postexercise bronchoconstriction in asthma (Patel, K. R., et al.), 285
Cutaneous reactivity to histamine, effect of beta adrenergic stimulation and blockade on (Lamkin, N., Jr., et al.), 449

D

Dairy farming population, midwest, precipitating antibodies in, toward antigens associated with farmer's lung disease (Roberts, R. C., et al.), 518
Dermatitis, atopic, defective T cell function in (Rachelefsky, G. S., et al.), 569
diagnosis and pathobiology (Blaylock, W. K.), 62
nickel, leukocyte migration inhibition in, *39* (Abst.)
Dermatology, *3, 10, 16, 31* (Abst.)
Dermatophagoides pteronyssinus extract, antigen and allergens of; mites and house dust allergy, *18* (Abst.)
Diabetics, insulin-treated, cell-mediated immunity to insulin and its polypeptide chains in, *5* (Abst.)
Diagnostic and therapeutic techniques, controversial, 283 (Correspondence)
Disease(s), Hodgkin's, transfer factor in, *26* (Abst.)

Disease(s)—Cont'd
severe obstructive lung, in 14-year-old girl with alpha-1 antitrypsin deficiency (Dunand, P., et al.), 615 (Allergy grand rounds)
T-cell–proliferative, H-rosette formation in, *39* (Abst.)
Disodium cromoglycate, action of; inhibition of cyclic 3′,5′-AMP phosphodiesterase (Lavin, N., et al.), 80
(Lomudal), evaluation of pituitary-adrenal function in patients with chronic bronchial asthma following substitution of steroid treatment with (Kaufman, H., et al.), 267
protective effect of, against airway constriction induced by hemp dust extract (Zuskin, E., and Bouhuys, A.), 473
solution, topical treatment of hay fever with, *22* (Abst.)
Dog serum, cat and, evidence for common allergens in; allergens of mammalian origin (Ohman, J. L., Jr., et al.), 560
Doxantrazole, antiallergic agent orally effective in man, *18* (Abst.)
oral, inhibitory effect of, on asthma induced by allergen inhalation, *22* (Abst.)
Drugs, anti-anaphylactic, several, modulation of formation and release of bovine SRS-A in vitro by, *34* (Abst.)
Dust, wood, hypersensitivity (Booth, B. H., et al.), 352

E

Eczema, infantile, pyogenic cocci in, throughout one year, *3* (Abst.)
Edema plasma, hereditary angioneurotic, observations on ultrastructure of lesions induced in human and guinea pig skin by C1 esterase and polypeptide from, *12* (Abst.)
Egg allergy, influenza vaccine, and immunoglobulin E antibody (Davies, R., and Pepys, J.), 373
Endocrine function, growth, pulmonary, and, in chronic asthma patients on daily and alternate-day adrenocorticosteroid therapy (Shapiro, G. G., et al.), 430
Eosinophil count, total, and adrenal function in asthmatic children, *30* (Abst.)
in asthmatic children (Blumberg, M. Z., and Buckley, J. M.), 493 (Brief communication)
Epstein-Barr virus–transformed lymphoblastoid cells in acute infectious mononucleosis, cell-mediated immunity to, *23* (Abst.)
Erythrocytes, mouse, rosette formation with, probable marker for human B lymphocytes, *38* (Abst.)
Exercise, treadmill, effect of, on asthmatic children (James, L., et al.), 408
Exercise-induced and methacholine-induced bronchoconstriction, metabolic changes in (Soifer, M. M., et al.), 577

F

Farmer's lung disease, precipitating antibodies in midwest dairy farming population toward antigens associated with (Roberts, R. C., et al.), 518
precipitin test negative—activation of alternative pathway of complement by mouldy hay dusts, *7* (Abst.)
Fire ant hypersensitivity, 187 (Correspondence)
Fungi, bacteria and, associated with hypersensitivity pneumonitis, activation of complement sequence by extracts of (Marx, J. J., and Flaherty, D. K.), 328
Fungus prevalence, winter, in air of midwestern homes, volumetric study of (Solomon, W. R.), 46

G

Gamma globulin, ragweed hyperimmune human, effect of, on in vivo and in vitro parameters of ragweed sensitivity (Rubinstein, E., et al.), 335
Glucocorticosteroids, immunosuppressive effects of; differential effects of acute vs. chronic administration of cell-mediated immunity, *33* (Abst.)
Gm allotype, antibody response, and mortality, correlation of, *12* (Abst.)
Granuloma, eosinophilic, of soft tissue, so-called Kimura's disease, histological and immunological studies on, *37* (Abst.)
Growth, pulmonary, and endocrine function in chronic asthma patients on daily and alternate-day adrenocorticosteroid therapy (Shapiro, G. G., et al.), 430
Guinea pig(s), immune response in, to penicillin-autologous carrier proteins, *19* (Abst.)
immunologically induced lung disease in (Santives, T., et al.), 582
skin, human and, observations on ultrastructure of lesions induced in, by C1 esterase and polypeptide from hereditary angioneurotic edema plasma, *12* (Abst.)

H

Hay dusts, mouldy, activation of alternative pathway of complement by; precipitin test negative farmer's lung, *7* (Abst.)

Hay—Cont'd
fever, asthma and, *2*, *16*, *22*, *30* (Absts.)
ragweed, treatment by local passive administration of IgG antibody, *16* (Abst.)
topical treatment of, with disodium cromoglycate (DSCG) solution, *22* (Abst.)
Hemp dust extract, airway constriction induced by, protective effect of disodium cromoglycate against (Zuskin, E., and Bouhuys, A.), 473
Hepatitis, viral, articular and cutaneous prodromal manifestations of, *10* (Abst.)
Hereditary angioedema, fresh frozen plasma for prophylaxis in, 624 (Correspondence)
angioneurotic edema plasma, observations on ultrastructure of lesions induced in human and guinea pig skin by C1 esterase and polypeptide from, *12* (Abst.)
vibratory angioedema; confirmation of histamine release in type of physical hypersensitivity (Metzger, W. J., et al.), 605 (Brief communication)
Heterogeneity of asthmatic patients—individualized approach to diagnosis and treatment (Spector, S. L., and Farr, R. S.), 499 (Allergy grand rounds)
Histamine analysis, automated, for in vitro allergy testing; method utilizing allergen-induced histamine release from whole blood (Siraganian, R. P., and Brodsky, M. J.), 525
complement-mediated release of, from human leukocytes, *33* (Abst.)
cutaneous reactivity to, effect of beta adrenergic stimulation and blockade on (Lamkin, N., Jr., et al.), 449
release, confirmation of, in type of physical hypersensitivity; hereditary vibratory angioedema (Metzger, W. J., et al.), 605 (Brief communication)
by ouabain, antigen-induced, inhibition of (Okazaki, T., et al.), 454
Histocompatibility complex, major, differential cellular immune responsiveness to systems of (Bach, F. H.), 95
Histological and immunological studies on eosinophilic granuloma of soft tissue, so-called Kimura's disease, *37* (Abst.)
HL-A antigens and lymphocyte response in ragweed allergy, relationship between (Yoo, T.-J., et al.), 25
Hodgkin's disease, transfer factor in, *26* (Abst.)
Home humidifier thermophilic actinomycete isolates (Seabury, J., et al.), 174 (Brief communication)
Honeybee venom, phospholipase A: major allergen in; allergy to insect stings (Sobotka, A. K., et al.), 29
House dust allergy, mites and; antigen and allergens of *Dermatophagoides pteronyssinus* extract, *18* (Abst.)
pyroglyphid mites, methods of destroying, *20* (Abst.)
H-rosette formation in T-cell–proliferative diseases, *39* (Abst.)
Human gamma globulin, ragweed hyperimmune, effect of, on in vivo and in vitro parameters of ragweed sensitivity (Rubinstein, E., et al.), 335
immunoglobulin(s), A_1, G_1, M and E, Fc domains of, structure, function and evolutionary relationships of, *40* (Abst.)
E, inhibition by prednisone of late cutaneous allergic responses induced by antiserum to (Poothullil, J., et al.), 184 (Brief communication)
T lymphocytes form rosettes with autologous and allogeneic human red blood cells, *6* (Abst.)
Humidifier, home, thermophilic actinomycete isolates (Seabury, J., et al.), 174 (Brief communication)
Humidity related to winter fungus prevalence in air of midwestern homes (Solomon, W. R.), 46
Hypersensitivity, fire ant, 187 (Correspondence)
physical, confirmation of histamine release in type of; hereditary vibratory angioedema (Metzger, W. J., et al.), 605 (Brief communication)
pneumonitis, activation of complement sequence by extracts of bacteria and fungi associated with (Marx, J. J., Jr., and Flaherty, D. K.), 328
immunologic cross-reactions among thermophilic actinomycetes associated with (Kurup, V. P., et al.), 417
to procarbazine associated with angioedema, urticaria, and low serum complement activity (Glovsky, M. M., et al.), 134
wood dust (Booth, B. H., et al.), 352

I

Immune response in guinea pig to penicillin-autologous carrier proteins, *19* (Abst.)
responsiveness, differential cellular, to systems of major histocompatibility complex (Bach, F. H.), 95

Immunity, cell-mediated, differential effects of acute vs. chronic administration of; immunosuppressive effects of glucocorticosteroids, *33* (Abst.)
to Epstein-Barr virus–transformed lymphoblastoid cells in acute infectious mononucleosis, *23* (Abst.)
to insulin and its polypeptide chains in insulin-treated diabetics, *5* (Abst.)
in iron and vitamin-deficient children, *26* (Abst.)
tumor, suppression of, by *Corynebacterium parvum*, *38* (Abst.)
competent cellular, in allergic rhinitis patients with elevated IgE (Yocum, M. W., et al.), 384 (Brief communication)
Immunofluorescence studies on renal tissue, tonsils, adenoids, nasal polyps and skin of atopic and nonatopic patients, with special reference to IgE, *19* (Abst.)
Immunogenicity, allergenicity and, of Basidiomycetes (Lopez, M., et al.), 480
Immunoglobulin(s) A, secretory, in human oral cavity, minor salivary glands as major source of, *25* (Abst.)
A_1, G_1, M and E, human, Fc domains of, structure, function and evolutionary relationships of, *40* (Abst.)
E antibody(ies), egg allergy, influenza vaccine, and (Davies, R., and Pepys, J.), 373
to pollen allergens account for high percentages of total immunoglobulin E protein, *23* (Abst.)
specific, local production of, in allergic rhinitis patients with negative skin tests, *14* (Abst.)
in nasal secretion, measurement of; evidence for local production, *40* (Abst.)
antigen-specific, calculations of, 512 (Correspondence)
elevated, competent cellular immunity in allergic rhinitis patients with (Yocum, M. W., et al.), 384 (Brief communication)
human, inhibition by prednisone of late cutaneous allergic responses induced by antiserum to (Poothullil, J., et al.), 164 (Brief communication)
levels in sera of cancer patients (Winters, W. D., and Heiner, D. C.), 181
G antibody, treatment of ragweed hay fever by local passive administration of, *16* (Abst.)
and M antiglobulins in seronegative and seropositive rheumatoid arthritis, routine assay for detection of, *23* (Abst.)
Immunoglobulin(s)—Cont'd
M, IgG and, antiglobulins in seronegative and seropositive rheumatoid arthritis, routine assay for detection of, *23* (Abst.)
precipitins, Alternaria, and adverse reactions (Busse, W. W., et al.), 367
Immunologic(al) cross-reactions among thermophilic actinomycetes associated with hypersensitivity pneumonitis (Kurup, V. P., et al.), 417
studies, clinical and, of timothy antigen D immunotherapy (Nelson, H. S., et al.), 463
of effect of whole body insect extracts in treatment of stinging insect allergy (Reisman, R. E., et al.), 547
histological and, on eosinophilic granuloma of soft tissue, so-called Kimura's disease, *37* (Abst.)
Immunologically induced lung disease in guinea pigs (Santives, T., et al.), 582
Immunology, *6*, *12*, *19*, *23*, *33*, *38* (Absts.)
Immunotherapy, timothy antigen D, clinical and immunological studies of (Nelson, H. S., et al.), 463
Infantile eczema, pyogenic cocci in, throughout one year, *3* (Abst.)
Influenza A vaccine, inactivated monovalent, reactions and serologic responses in young children and infants after administration of, *27* (Abst.)
type B vaccine, inactivated monovalent, clinical reactions and serologic response following, in young children and infants, *36* (Abst.)
vaccine, egg allergy, and immunoglobulin E antibody (Davies, R., and Pepys, J.), 373
Inhalation challenge tests, nasal, improved technique for (McLean, J. A., et al.), 153
Insect extracts, whole body, immunological studies of effect of, in treatment of stinging insect allergy (Reisman, R. E., et al.), 547
sting(s), allergy to; allergenic cross-reactivity among vespid venoms (Kern, F., et al.), 554
phospholipase A: major allergen in honeybee venom (Sobotka, A. K., et al.), 29
Interferon, inhibition of sensitization of delayed type hypersensitivity to sheep red blood cells by, *25* (Abst.)
Iron and vitamin-deficient children, cell-mediated immunity in, *26* (Abst.)
Isoproterenol, propranolol, and practolol in asthmatic and normal subjects, comparison of respiratory and cardiovascular effects of (Ryo, U. Y., and Townley, R. G.), 12

K

Kimura's disease, eosinophilic granuloma of soft tissue so-called, histological and immunological studies on, *37* (Abst.)

L

Leukocyte(s), complement-mediated release of histamine from, *33* (Abst.)
migration inhibition in nickel dermatitis, *39* (Abst.)
of stressed newborn infants, decreased bactericidal activity of, *17* (Abst.)
Lomudal (disodium cromoglycate) evaluation of pituitary-adrenal function in patients with chronic bronchial asthma following substitution of steroid treatment with (Kaufman, H., et al.), 267
Lung disease immunologically induced, in guinea pigs (Santives, T., et al.), 582
severe obstructive, in 14-year-old girl with alpha-1 antitrypsin deficiency (Dunand, P., et al.), 615 (Allergy grand rounds)
Lymphoblasts, chemotaxis of, *14* (Abst.)
Lymphocyte(s), cutaneous sensitivity and in vitro responsiveness of, in patients with disseminated coccidioidomycosis, *31* (Abst.)
human B, rosette formation with mouse erythrocytes probable marker for, *38* (Abst.)
response in ragweed allergy, relationship between HL-A antigens and (Yoo, T.-J., et al.), 25

M

Mammalian origin, allergens of; evidence for common allergens in cat and dog serum (Ohman, J. L., Jr., et al.), 560
Metabolic changes in exercise-induced and methacholine-induced bronchoconstriction (Soifer, M. M., et al.), 577
studies, use of blood components for; prostaglandins and asthma (Okazaki, T., et al.), 124
Metabolism, tryptophane, in bronchial asthma, *3* (Abst.)
vitamin C, and atopic allergy, *31* (Abst.)
Meteorologic parameters, pollen season severity and, in central New Jersey (Reiss, N. M., and Kostic, S. R.), 609 (Brief communication)
Methacholine-induced bronchoconstriction, exercise-induced and, metabolic changes in (Soifer, M. M., et al.), 577
Mites and house dust allergy; antigen and allergens of *Dermatophagoides pteronyssinus* extract, *18* (Abst.)
pyroglyphid, methods of destroying, *20* (Abst.)
Mononucleosis, acute infectious, cell-mediated immunity to Epstein-Barr virus–transformed lymphoblastoid cells in, *23* (Abst.)
Mortality, correlation of Gm allotype, antibody response, and, *12* (Abst.)
Mouse erythrocytes, rosette formation with, probable marker for human B lymphocytes, *38* (Abst.)
homocytotropic and heterocytotropic antibodies, properties of (Lehrer, S. B., and Vaughan, J. H.), 422

N

N(3′,4′-dimethoxycinnamoyl) anthranilic acid (N-5′) (Koda, A., et al.), 396
Nasal inhalation challenge tests, improved technique for (McLean, J. A., et al.), 153
polyps of atopic and nonatopic patients, immunofluorescence studies on, *19* (Abst.)
secretion, measurement of specific IgE antibodies in; evidence for local production, *40* (Abst.)
New Jersey, central, pollen season severity and meteorologic parameters in (Reiss, N. M., and Kostic, S. R.), 609 (Brief communication)
Newborn infants, stressed, decreased bactericidal activity of leukocytes of, *17* (Abst.)
Nickel dermatitis, leukocyte migration inhibition in, *39* (Abst.)
Nicotinamide, inhibition by, of an homologous PCA reaction and antigen-induced histamine release from rat peritoneal mast cells, *24* (Abst.)
Nuts, allergy to, detection of, by radioallergosorbent test (Gillespie, D. N., et al.), 302

O

Obituaries
Harnett, Jane, 628
Swineford, Oscar, Jr., 628
Oral cavity, human, minor salivary glands as major source of secretory immunoglobulin A in, *25* (Abst.)
Otolaryngology, otorhinology and, *14, 40* (Absts.)
Otorhinology and otolaryngology, *14, 40* (Absts.)
Ouabain, inhibition of antigen-induced histamine release by (Okazaki, T., et al.), 454

P

Pathology, pharmacology, physiology, and, *4, 11, 18, 31, 37* (Absts.)
Pediatrics, *10, 17, 27, 36* (Absts.)
Penicillin, haemolytic anaemia due to, *32* (Abst.)
Penicillin-autologous carrier proteins, immune response in guinea pig to, *19* (Abst.)

Peptide inhibition of Prausnitz-Küstner reaction, *7* (Abst.)
Pharmacology, physiology, and pathology, *4, 11, 18, 31, 37* (Absts.)
Phosphodiesterase, cyclic 3′,5′-AMP, inhibition of; action of disodium cromoglycate (Lavin, N., et al.), 80
Phospholipase A: major allergen in honeybee venom; allergy to insect stings (Sobotka, A. K., et al.), 29
Physiology, pharmacology, and pathology, *4, 11, 18, 31, 37* (Absts.)
Pi variant phenotypes in asthmatic children, prevalence of, alpha-1 antitrypsin levels and (Katz, R. M., et al.), 41
Pituitary-adrenal function, evaluation of, in patients with chronic bronchial asthma following substitution of steroid treatment with disodium cromoglycate (Lomudal) (Kaufman, H., et al.), 267
Plasma, fresh frozen, for prophylaxis in hereditary angioedema, 624 (Correspondence)
  hereditary angioneurotic edema, observations on ultrastructure of lesions induced in human and guinea pig skin by C1 esterase and polypeptide from, *12* (Abst.)
Pneumonitis, hypersensitivity, activation of complement sequence by extracts of bacteria and fungi associated with (Marx, J. J., Jr., and Flaherty, D. K.), 328
  immunologic cross-reactions among thermophilic actinomycetes associated with (Kurup, V. P., et al.), 417
Pollen(s) allergens, immunoglobulin E antibodies to, account for high percentages of total immunoglobulin E protein, *23* (Abst.)
  major aeroallergenic, in vitro cross-allergenicity of, by radioallergosorbent technique (Bernstein, I. L., et al.), 141
  native ragweed, modifications of Wright Dust Feed Mechanism permitting stable dispersion of (Solomon, W. R.), 177 (Brief communication)
  season severity and meteorologic parameters in central New Jersey (Reiss, N. M., and Kostic, S. R.), 609 (Brief communication)
  of weedy forbs at midwestern station; volumetric studies of aeroallergen prevalence (Solomon, W. R.), 318
Polymer, analysis of stability of molecular size and antigenic reactivity of; polymerized ragweed antigen E (Patterson, R., and Suszko, I. M.), 168 (Brief communication)
Polyps, nasal, of atopic and nonatopic patients, immunofluorescence studies on, *19* (Abst.)
Practolol, isoproterenol, propranolol, and, comparison of respiratory and cardiovascular effects of (Ryo, U. Y., and Townley, R. G.), 12
Prausnitz-Küstner reaction, peptide inhibition of, *7* (Abst.)
Precipitin(s), Alternaria IgG, and adverse reactions (Busse, W. W., et al.), 367
  test negative farmer's lung—activation of alternative pathway of complement by mouldy hay dusts, *7* (Abst.)
Prednisolone and prednisone, kinetics of interconversion of, studied with new radioimmunoassay, *11* (Abst.)
Prednisone, inhibition by, of late cutaneous allergic responses induced by antiserum to human IgE (Poothullil, J., et al.), 164 (Brief communication)
  oral, inhaled corticosteroids compared with, in patients starting long-term corticosteroid therapy for asthma, *4* (Abst.)
  prednisolone and, kinetics of interconversion of, studied with new radioimmunoassay, *11* (Abst.)
Presidential address (Norman, P. S.), 513
Procarbazine, hypersensitivity to, associated with angioedema, urticaria, and low serum complement activity (Glovsky, M. M., et al.), 134
Propranolol, isoproterenol, and practolol in asthmatic and normal subjects, comparison of respiratory and cardiovascular effects of (Ryo, U. Y., and Townley R. G.), 12
Prostaglandin(s) and asthma; use of blood components for metabolic studies (Okazaki, T., et al.), 124
  levels, serum, in asthmatic patients (Nemoto, T., et al.), 89
Protein(s), penicillin-autologous carrier, immune response in guinea pig to, *19* (Abst.)
  total immunoglobulin E, immunoglobulin E antibodies to pollen allergens account for high percentages of, *23* (Abst.)
Pulmonary, growth, and endocrine function in chronic asthma patients on daily and alternate-day adrenocorticosteroid therapy (Shapiro, G. G., et al.), 430
Purpura, anaphylactoid, selective deficiency of second component of complement in patient with, *16* (Abst.)
Pyogenic cocci in infantile eczema throughout one year, *3* (Abst.)
Pyroglyphid mites, house dust, methods of destroying, *20* (Abst.)

R

Radioallergosorbent technique, in vitro cross-allergenicity of major aeroallergenic pollens by (Bernstein, I. L., et al.), 141
test, detection of allergy to nuts by (Gillespie, D. N., et al.), 302
for measurement of Alternaria allergens, establishment of (Yunginger, J. W., et al.), 293
Radioimmunoassay, kinetics of interconversion of prednisolone and prednisone studied with, *11* (Abst.)
for measuring antibody levels; in vitro reaction of antibodies to ragweed, *32* (Abst.)
Ragweed allergy, relationship between HL-A antigens and lymphocyte response in (Yoo, T.-J., et al.), 25
antibodies to, in vitro reaction of; radioimmunoassay for measuring antibody levels, *32* (Abst.)
antigen E, polymerized; analysis of stability of molecular size and antigenic reactivity of polymer (Patterson, R., and Suszko, I. M.), 168 (Brief communication)
hay fever, treatment by local passive administration of IgG antibody, *16* (Abst.)
hyperimmune human gamma globulin, effect of, on in vivo and in vitro parameters of ragweed sensitivity (Rubinstein, E., et al.), 335
pollen, native, modifications of Wright Dust Feed Mechanism permitting stable dispersion of (Solomon, W. R.), 177 (Brief communication)
Rat peritoneal mast cells, inhibition by nicotinamide of an homologous PCA reaction and antigen-induced histamine release from, *24* (Abst.)
Reactions, hypersensitivity, inhibition of, by new drug, N(3′,4′-dimethoxycinnamoyl) anthranilic acid (N-5′) (Koda, A., et al.), 396
Reactivity, cutaneous, to histamine, effect of beta adrenergic stimulation and blockade on (Lamkin, N., Jr., et al.), 449
Renal tissue, of atopic and nonatopic patients, immunofluorescence studies on, *19* (Abst.)
Respiratory and cardiovascular effects of isoproterenol, propranolol, and practolol, comparison of, in asthmatic and normal subjects (Ryo, U. Y., and Townley, R. G.), 12
injury, mechanism of, by toluene diisocyanate, *11* (Abst.)
Rheumatoid arthritis, seronegative and seropositive, routine assay for detection of IgG and IgM antiglobulins in, *23* (Abst.)
Rhinitis, allergic, median age at onset of asthma and, in Tecumseh, Michigan (Schachter, J., and Higgins, M. W.), 342
patients, allergic, with elevated IgE, competent cellular immunity in (Yocum, M. W., et al.), 384 (Brief communication)
with negative skin tests, local production of specific IgE antibodies in, *14* (Abst.)
subjects, allergic, normal and, effect of beta adrenergic blockade on bronchial sensitivity to acetyl-beta-methacholine in (Townley, R. G., et al.), 358
Rosette formation, H-, in T-cell–proliferative diseases, *39* (Abst.)
with mouse erythrocytes, probable marker for human B lymphocytes, *38* (Abst.)

S

Salivary gland, minor, as major source of secretory immunoglobulin A in human oral cavity, *25* (Abst.)
Seizures, theophylline-induced, in adults, *4* (Abst.)
Sensitivity, ragweed, effect of ragweed hyperimmune human gamma globulin on in vivo and in vitro parameters of (Rubinstein, E., et al.), 335
Serum prostaglandin levels in asthmatic patients (Nemoto, T., et al.), 89
Sheep red blood cells, delayed type hypersensitivity to; inhibition of sensitization by interferon, *25* (Abst).
Skin of atopic and nonatopic patients, immunofluorescence studies on, *19* (Abst.)
Smoke-induced allergy, tobacco, mechanism for (Keller, K. F., and Doyle, R. J.), 278
Spiramycin, macrolide antibiotic, asthma due to inhaled chemical agents, *28* (Abst.)
SRS-A, bovine, modulation of formation and release of, in vitro by several anti-anaphylactic drugs, *34* (Abst.)
Steroid treatment with disodium cromoglycate (Lomudal), evaluation of pituitary-adrenal function in patients with chronic bronchial asthma following substitution of (Kaufman, H., et al.), 267
Steroid-treated asthmatic population, prevalence of tuberculosis and positive tuberculin skin tests in, *30* (Abst.)
Sting, insect, allergy to; allergenic cross-reactivity among vespid venoms (Kern, F., et al.), 554

Stinging insect allergy, whole body insect extracts in treatment of, immunological studies of effect of (Reisman, R. E., et al.), 547
Structure, function and evolutionary relationships of Fc domains of human immunoglobulins, A_1 G_1, M and E, *40* (Abst.)

T

T cell function, defective, in atopic dermatitis (Rachelefsky, G. S., et al.), 569
–proliferative diseases, H-rosette formation in, *39* (Abst.)
lymphocytes, human, form rosettes with autologous and allogeneic human red blood cells, *6* (Abst.)
Tartrazine sensitivity, significance of, in chronic urticaria of unknown etiology (Settipane, G. A., et al.), 541
Tests, nasal inhalation challenge, improved technique for (McLean, J. A., et al.), 153
Theophylline-induced seizures in adults, *4* (Abst.)
Therapeutic techniques, controversial diagnostic and, 283 (Correspondence)
Thermophilic actinomycete isolates, home humidifier (Seabury, J., et al.), 174 (Brief communication)
Thymoxamine, and cromolyn sodium, effect of, on postexercise bronchoconstriction in asthma (Patel, K. R., et al.), 285
Timothy antigen D immunotherapy, clinical and immunological studies of (Nelson, H. S., et al.), 463
Tobacco smoke–induced allergy, mechanism for (Keller, K. F., and Doyle, R. J.), 278
Toluene diisocyanate, mechanism of respiratory injury by, *11* (Abst.)
Tonsils of atopic and nonatopic patients, immunofluorescence studies on, *19* (Abst.)
Treadmill exercise, effect of, on asthmatic children (James, L., et al.), 408
Triamcinolone acetonide aerosols for asthma; effective replacement of systemic corticosteroid therapy (Falliers, C. J.), 1
Tryptophane metabolism in bronchial asthma, *3* (Abst.)
Tuberculin skin tests, positive, prevalence of tuberculosis and, in steroid-treated asthmatic population, *30* (Abst.)
Tuberculosis, prevalence of, and positive tuberculin skin tests in steroid-treated asthmatic population, *30* (Abst.)
Tumor immunity, cell-mediated, suppression of, by *Corynebacterium parvum*, *38* (Abst.)

U

Uritcaria, angioedema, and low serum complement activity, hypersensitivity to procarbazine associated with (Glovsky, M. M., et al.), 134
chronic, and angioedema, C1-bypass complement-activation pathway in patients with, *10* (Abst.)
of unknown etiology, significance of tartrazine sensitivity in (Settipane, G. A., et al.), 541

V

Vaccine, inactivated monovalent influenza A, reactions and serologic responses in young children and infants after administration of, *27* (Abst.)
type B, in young children and infants, clinical reactions and serologic response following, *36* (Abst.)
influenza, egg allergy, and immunoglobulin E antibody (Davies, R., and Pepys, J.), 373
Valerate, betamethasone, compared by oral and inhaled routes in childhood asthma (Frears, J., et al.), 391
Venoms, vespid, allergenic cross-reactivity among; allergy to insect sting (Kern, F., et al.), 554
Viral hepatitis, articular and cutaneous prodromal manifestations of, *10* (Abst.)
Vitamin C metabolism and atopic allergy, *31* (Abst.)
Vitamin-deficient children, iron and, cell-mediated immunity in, *26* (Abst.)

W

Weedy forbs, pollens of, at midwestern station; volumetric studies of aeroallergen prevalence (Solomon, W. R.), 318
Wood dust hypersensitivity (Booth, B. H., et al.), 352
Wright Dust Feed Mechanism permitting stable dispersion of native ragweed pollen, modifications of (Solomon, W. R.), 177 (Brief communication)

Subject index

A

Acetylcholine, prostaglandin $F_{2\alpha}$, histamine, and serotonin after chronic antigen exposure, canine airway responses to (Krell, R. D., et al.), 664

Adrenal function, effects of long-term alternate-day steroids on parameters of, in renal transplant patients, *18* (Abst.)

Adrenaline and tropical pulmonary eosinophilia, *12* (Abst.)

Adrenergic–blocking agents, beta, effect of pertussis and, on mast cells (Guirgis and Townley), 241

responses, decreased, in lymphocytes and granulocytes in atopic eczema (Busse and Lee), 586

Aeroallergen immunotherapy, nonorganic adverse reactions to (Schatz, M., et al.), 198

Aerosol(s), atropine and albuterol, effect of, on human bronchial response to histamine (Casterline, C. L., et al.), 607

beclomethasone dipropionate, in treatment of chronic bronchial asthma (Vogt, F., et al.), 316

Airway disease, obstructive, associated with heterozygous alpha-1 antitrypsin deficiency (Johnson, T. F., et al.), 69

Albuterol aerosols, effect of atropine and, on human bronchial response to histamine (Casterline, C. L., et al.), 607

Allergen(s), *Alternaria*, studies on; measurement of relative potency of commercial *Alternaria* extracts by direct RAST and by RAST inhibition (Yunginger, J. W., et al.), 405

in bee venom; separation and identification of major allergens (Hoffman and Shipman), 551

induced nasal stenosis, effect of beclomethasone dipropionate aerosol on, *28* (Abst.)

pollen, cross-reactivity of IgE antibodies with; analyses of various species of grass pollens (Leiferman and Gleich), 129

of ragweed and other fall weed pollens (Leiferman, K. M., et al.), 140

Allergenicity, antigenicity and, of phospholipase A_2 of bee venom, studies of (Light, W. C., et al.), 322

Allergic asthma, effect of cholinergic agents on canine model of (Krell, R. D., et al.), 19

lung disease, etiology of, role of precipitins and complement activation in (Olenchock and Burrell), 76

patients, eccrine sweat responses in; cholinergic nervous system and immediate hypersensitivity (Kaliner, M.), 308

some, hypersensitivity to aspirin-like drugs shown by (Vane, J. R.), 691

reactions, eosinophil in; eosinophil-derived inhibitor of histamine release, *4* (Abst.)

July, part 1, pp. 1-120; July, part 2, pp. 121-240; August, pp. 241-356; September, pp. 357-446; October, pp. 447-538; November, pp. 539-622; December, pp. 623-742.

Abstracts: July, part 1, pp. *1-6;* August, pp. *7-14;* September, pp. *15-22;* October, pp. *23-28;* November, pp. *29-34;* December, pp. *35-40.*

Allergic, reactions—Cont'd
to insulin (Lamkin, N., et al.), 213 (Allergy grand rounds)
responses, late cutaneous, factors which influence (Umemoto, L., et al.), 60
rhinitis, asthma and, risk factors for developing (Hagy and Settipane), 330
perennial, treatment of, with cromolyn sodium (Cohan, R. H., et al.), 121

Allergy(ies), controversial diagnostic and therapeutic techniques employed in, 620 (Correspondence)
diagnosis of, to stinging insects by skin testing with Hymenoptera venoms, *19* (Abst.)
food, cytotoxic testing for: evaluation of reproducibility and correlation (Benson and Arkins), 471
diagnosis of, by radioallergosorbent test (Chua, Y. Y., et al.), 477
in vivo and in vitro correlates of (Chua, Y. Y., et al.), 299
house dust, house dust mite and, *37* (Abst.)
-immunology listings, professional opportunities, 76 (Ad section)
and learning disabilities in children, *9* (Abst.)
miscellaneous, *3, 10, 19, 26, 32, 37* (Absts.)
profiles from bloodstains, *33* (Abst.)
to ragweed antigen E: effect of specific immunotherapy on reactivity of human T lymphocytes in vitro, *4* (Abst.)
to tetracycline preparation—case report, *32* (Abst.)

Alternaria allergens, studies on; measurement of relative potency of commercial *Alternaria* extracts by direct RAST and RAST inhibition (Yunginger, J. W., et al.), 405
alternata, variability of: biochemical and immunological characteristics of culture filtrates from seven isolates (Schumacher and Jeffery), 263
extracts, commercial, measurement of relative potency of, by direct RAST and by RAST inhibition; studies on *Alternaria* allergens (Yunginger, J. W., et al.), 405

Alum-precipitated pyridine extracts in animal dander sensitive patients, hyposensitization therapy with, *10* (Abst.)

American Academy of Allergy, Historian's report, 614

Aminophylline and salbutamol, intravenous, comparison of, in severe asthma, *17* (Abst.)

Anaphylatoxin, effect of; induction of histamine release and desensitization in human leukocytes, *31* (Abst.)

Anaphylaxis, *21* (Abst.)
severe, due to passive sensitization by donor blood, *26* (Abst.)
systemic, hypersensitivity to histamine and, in mice with pharmacologic beta adrenergic blockade: protection by nucleotides (Matsumura, Y., et al.), 387

Anemia, modest, patient with IgE myeloma presenting with bone lesions and (Weiner, E., et al.), 372
pernicious, asthma, and reactions to gamma globulin, common variable immunodeficiency with; treatment with plasma (Ehtessabian, R., et al.), 337 (Allergy grand rounds)

Animal dander sensitive patients, hyposensitization therapy with alum-precipitated pyridine extracts in, *10* (Abst.)

Ant, imported fire, hypersensitivity (James, F. K., et al.), 110

Antibody(ies), IgE, cross-reactivity of, with pollen allergens; analyses of various species of grass pollens (Leiferman and Gleich), 129
of ragweed and other fall weed pollens (Leiferman, K. M., et al.), 140
mediating type 1 skin test reactions to polysaccharide and protein antigens of *Candida albicans, 20* (Abst.)
synthesis, reaginic, genetic control of; reagin synthesis in inbred rats (Murphey, S. M., et al.), 381

Antigen(s), cockroach, study on, as probable causative agent in bronchial asthma (Kang, B.), 357
colon-specific, duodenum-, ileum-, and, *27* (Abst.)
D immunotherapy, timothy, 618 (Correspondence)
E, skin test and, stability of short ragweed pollen extract as measured by (Franklin, R. M., et al.), 51
exposure, canine airway responses to acetylcholine, prostaglandin $F_{2\alpha}$, histamine, and serotonin after (Krell, R. D., et al.), 664

Antigenicity and allergenicity of phospholipase A_2 of bee venom, studies of (Light, W. C., et al.), 322

Antitrypsin deficiency, heterozygous alpha-1, obstructive airway disease associated with (Johnson, T. F., et al.), 69

Ascaris suum antigen, aerosolized, activity in primates against, *34* (Abst.)

Aspirin and similar compounds, mode of action of (Vane, J. R.), 691

Aspirin-induced asthma (Szczeklik, A., et al.), 10
bronchospasm, effect of sodium cromoglycate in preventing, *30* (Abst.)
Asthma, acute effects of terbutaline and epinephrine on (Schwartz, H. J., et al.), 516 (Brief communication)
rapid prediction of need for hospitalization in, *9* (Abst.)
allergic, canine model of, effect of cholinergic agents on (Krell, R. D., et al.), 19
rhinitis and, risk factors for developing (Hagy and Settipane), 330
aspirin-induced (Szczeklik, A., et al.), 10
associated with severe respiratory tract infections, serum immunoglobulins in children with, *36* (Abst.)
baker's, *26* (Abst.)
immunologic studies in case of (Wilbur and Ward), 366
bronchial, bronchial reactivity to histamine before and after sodium cromoglycate in, *37* (Abst.)
study on cockroach antigen as probable causative agent in (Kang, B.), 357
chronic bronchial, beclomethasone dipropionate aerosol in treatment of (Vogt, F., et al.), 316
due to soldering flux: polyether alcohol–propylene glycol mixture, *24* (Abst.)
exercise-induced, incidence of, in children (Kawabori, I., et al.), 447
standardized method of evaluating (Eggleston and Guerrant), 414
and hay fever, *2, 8, 16, 24, 30* (Absts.)
IgA deficiency, and respiratory infections (Baker, J., et al.), 713 (Allergy grand rounds)
life-threatening, management of, with intravenous isoproterenol infusions, *2* (Abst.)
meatwrappers', clinical and bronchial provocation studies in patients with (Andrasch, R. H., et al.), 291
pernicious anemia, and reactions to gamma globulin, common variable immunodeficiency with; treatment with plasma (Ehtessabian, R., et al.), 337 (Allergy grand rounds)
severe, comparison of intravenous aminophylline and salbutamol in, *17* (Abst.)
Asthmatic(s), adult, evaluation of exercise-induced bronchospasm in (Field, J., et al.), 575
children, objective clinical and laboratory studies of immediate hypersensitivity reactions to foods in (May, C. D.), 500
Asthmatic(s)—Cont'd
corticosteroid-dependent, evaluated by Corticosteroid Dose Graph (Cooper and Patterson), 635
patients, plasma histamine changes during provoked bronchospasm in (Bhat, K. N., et al.), 647
peripheral plasma determinations of prostaglandin E in (Allegra, J., et al.), 546
reactions to environmental temperature changes, effect of sodium cromoglycate on, *2* (Abst.)
responses, dual, in wheat flour–sensitive subjects, inhibitory effects of various drugs on (Nakazawa, T., et al.), 1
subjects, beta blockade of bronchial smooth muscle in, 351 (Correspondence)
Atopic children, T lymphocytes in, *36* (Abst.)
Atropine and albuterol aerosols, effect of, on human bronchial response to histamine (Casterline, C. L., et al.), 607

B

Baker's asthma, *26* (Abst.)
immunologic studies in case of (Wilbur and Ward), 366
Basophil(s), circulating, in normal subjects and in subjects with hay fever (Hirsch and Kalbfleisch), 676
granulocytes, mediator release from, in chronic myelogenous leukemia (Clark, R. A. F., et al.), 623
hypersensitivity, cutaneous (Dvorak, H. F.), 229
Beclomethasone dipropionate aerosol, effect of, on allergen induced nasal stenosis, *28* (Abst.)
in treatment of chronic bronchial asthma (Vogt, F., et al.), 316
Bee venom, allergens in; separation and identification of major allergens (Hoffman and Shipman), 551
studies of antigenicity and allergenicity of phospholipase A_2 of (Light, W. C., et al.), 322
Benzyl penicilloyl, isologous IgG-induced tolerance to, *20* (Abst.)
Beta adrenergic blockade, pharmacologic, histamine hypersensitivity in mice induced by *Bordetella pertussis* or (Matsumura, Y., et al.), 395
hypersensitivity to histamine and systemic anaphylaxis in mice with; protection by nucleotides (Matsumura, Y., et al.), 387
-blocking activities of practolol, sotalol, and propranolol, comparison of, in human and guinea pig tracheal smooth muscle (Adolphson and Townley), 683

Betamethasone valerate, intranasal, in treatment of seasonal rhinitis, *5* (Abst.)

Biochemical and immunological characteristics of culture filtrates from seven isolates; variability of *Alternaria alternata* (Schumacher and Jeffery), 263

Biological aspects of leukotactic factors (Ward, P. A.), 224 (Requested manuscript)

Blastogenesis, stimulated lymphocyte, circadian rhythm of (Kaplan, M. S., et al.), 180

Blood, donor, severe anaphylaxis due to passive sensitization by, *26* (Abst.)

lymphocytes, human peripheral, in vitro production of IgE by; effect of cholera toxin and β-adrenergic stimulation, *38* (Abst.)

Bloodstains, allergy profiles from, *33* (Abst.)

Bone lesions, anemia and, patient with IgE myeloma presenting with (Weiner, E., et al.), 373

Bordetella pertussis or pharmacologic beta adrenergic blockade, histamine hypersensitivity in mice induced by (Matsumura, Y., et al.), 395

Bronchial asthma, chronic, beclomethasone dipropionate aerosol in treatment of (Vogt, F., et al.), 316

study on cockroach antigen as probable causative agent in (Kang, B.), 357

provocation studies, clinical and, in patients with meatwrappers' asthma (Andrasch, R. H., et al.), 291

reactivity to histamine before and after sodium cromoglycate in bronchial asthma, *37* (Abst.)

response, human, to histamine, effect of atropine and albuterol aerosols on (Casterline, C. L., et al.), 607

Bronchoconstriction, IgE-mediated anaphylactic, in guinea pig and effect of disodium cromoglycate, *21* (Abst.)

Bronchodilator administration, long-term, cardiopulmonary effects of (Wilson, A. F., et al.), 204

Bronchospasm, aspirin induced, effect of sodium cromoglycate in preventing, *30* (Abst.)

exercise-induced, evaluation of, in adult asthmatic (Field, J., et al.), 575

measurement of plasma prostaglandins during (Field, J., et al.), 581

provoked, in asthmatic patients, plasma histamine changes during (Bhat, K. N., et al.), 647

C

Candida albicans, antibodies mediating type 1 skin test reactions to polysaccharide and protein antigens of, *20* (Abst.)

Canine airway responses to acetylcholine, prostaglandin $F_{2\alpha}$, histamine, and serotonin after chronic antigen exposure (Krell, R. D., et al.), 664

model of allergic asthma, effect of cholinergic agents on (Krell, R. D., et al.), 19

Cardiopulmonary effects of long-term bronchodilator administration (Wilson, A. F., et al.), 204

Cedar, mountain, pollinosis, immunotherapy for (Pence, H. L., et al.), 39

Cell(s), mast, effect of pertussis and beta adrenergic–blocking agents on (Guirgis and Townley), 241

rat mast, binding of human IgE immunoglobulin to, *39* (Abst.)

Cell-mediated immunity to herpes simplex virus in man; antibody-mediated cell-dependent immune lysis of herpes virus–infected target cells (Russell and Kaiser), 539

intact humoral and, in chronic marijuana smoking (Rachelefsky, G. S., et al.), 483

in patients with cystic fibrosis, *11* (Abst.)

Children, allergy and learning disabilities in, *9* (Abst.)

asthmatic, objective clinical and laboratory studies of immediate hypersensitivity reactions to foods in (May, C. D.), 500

healthy, serum IgE levels in, quantified by sandwich technique (PRIST), *20* (Abst.)

incidence of exercise-induced asthma in (Kawabori, I., et al.), 447

Cholera toxin and β-adrenergic stimulation, effect of; in vitro production of IgE by human peripheral blood lymphocytes, *38* (Abst.)

Cholinergic agents, effect of, on canine model of allergic asthma (Krell, R. D., et al.), 19

nervous system and immediate hypersensitivity; eccrine sweat responses in allergic patients (Kaliner, M.), 308

Circadian rhythm of stimulated lymphocyte blastogenesis (Kaplan, M. S., et al.), 180

Clinical and bronchial provocation studies in patients with meatwrappers' asthma (Andrasch, R. H., et al.), 291

Cockroach antigen, study on, as probable causative agent in bronchial asthma (Kang, B.), 357

Coeliac disease with farmer's lung, *40* (Abst.)
Colon-specific antigens, ileum-, duodenum-, and, *27* (Abst.)
Complement activation, role of precipitins and, in etiology of allergic lung disease (Olenchock and Burrell), 76
sequence, activation of, by extracts of bacteria and fungi associated with hypersensitivity pneumonitis, 355 (Correspondence)
Compound 48/80, ragweed and, histologic studies of human skin test responses to; effects of alternate-day steroid therapy (Zweiman, B., et al.), 657
Corticosteroid(s) Dose Graph (Cooper and Patterson), 635
effect of, on human IgG synthesis, *39* (Abst.)
flunisolide, new synthetic, treatment of ragweed hay fever with intranasal spray containing (Turkeltaub, P. C., et al.), 597
Cromoglycate, inhibition of allergic reactions by, and by new anti-allergic drug, *34* (Abst.)
Cromolyn sodium, hypersensitivity reactions to, immunologic components of, *3* (Abst.)
treatment of perennial allergic rhinitis with (Cohan, R. H., et al.), 121
Cutaneous allergic responses, late, factors which influence (Umemoto, L., et al.), 60
basophil hypersensitivity (Dvorak, H. F.), 229 (Requested manuscript)
Cyclophosphamide, generalized urticaria to: type I hypersensitivity to immunosuppressive agent (Lakin and Cahill), 160
Cystic fibrosis, cell-mediated immunity in patients with, *11* (Abst.)
immediate hypersensitivity in patients with, *5* (Abst.)
patients, elevated serum IgG 4 levels in, *31* (Abst.)
Cytotoxic testing for food allergy: evaluation of reproducibility and correlation (Benson and Arkins), 471

D

Defense mechanisms of body closely interrelated, in mediators of inflammation (Ratnoff, O. D.), 438 (Requested manuscript)
Deficiency, IgA, in one of identical twins, *11* (Abst.)
secretory component, disorder of IgA immune system, *32* (Abst.)
Dermatophagoides pteronyssinus and grass pollen in school children, prevalency of immediate positive skin tests to, *17* (Abst.)
Diisocyanate, toluene (TDI), pulmonary disease: immunologic and inhalation challenge studies (Butcher, B. T., et al.), 89
Disabilities, learning, allergy and, in children, *9* (Abst.)
Disease, chronic granulomatous, leukocyte glutathione peroxidase deficiency in male patient with, *24* (Abst.)
coeliac, with farmer's lung, *40* (Abst.)
Disodium cromoglycate, IgE-mediated anaphylactic bronchoconstriction in guinea pig and effect of, *21* (Abst.)
in ragweed-allergic rhinitis (Knight, A., et al.), 278
Dose Graph, Corticosteroid (Cooper and Patterson), 635
Drug(s) containing tartrazine dye (Smith and Slavin), 456
various, inhibitory effects of, on dual asthmatic responses in wheat flour–sensitive subjects (Nakazawa, I., et al.), 1
Duodenum-, ileum- and colon-specific antigens, *27* (Abst.)
Dye, tartrazine, drugs containing (Smith and Slavin), 456

E

Eccrine sweat responses in allergic patients; cholinergic nervous system and immediate hypersensitivity (Kaliner, M.), 308
Eczema, atopic, decreased adrenergic responses in lymphocytes and granulocytes in (Busse and Lee), 586
Edema, thrombosis, immunologic reactions, inflammation, and, in mediators of inflammation (Ratnoff, O. D.), 438 (Requested manuscript)
Environmental temperature changes, effect of sodium cromoglycate on asthmatic reactions to, *2* (Abst.)
Enzyme(s), catabolic, histaminase and histamine methyl transferase, in human leukocytes, cellular and subcellular localization of; histamine metabolism (Zeiger, R. S., et al.), 172
contamination, artefact due to; fibrinolytic activity of allergenic preparations, *12* (Abst.)
Eosinophil in allergic reactions, role of; eosinophil-derived inhibitor of histamine release, *4* (Abst)

Eosinophilia, experimental, studies in; dependence of eosinophilia, apparently induced by histamine, on acidity, *25* (Abst.)
tropical pulmonary, adrenaline and, *12* (Abst.)
Epinephrine, terbutaline and, acute effects of, on asthma (Schwartz, H. J., et al.), 516 (Brief communication)
Exercise-induced asthma, incidence of, in children (Kawabori, I., et al.), 447
standardized method of evaluating (Eggleston and Guerrant), 414
bronchospasm, evaluation of, in adult asthmatic (Field, J., et al.), 575
measurement of plasma prostaglandins during (Field, J., et al.), 581

F

Fibrinolytic activity of allergenic preparations; artefact due to enzyme contamination, *12* (Abst.)
Fire ant, imported, hypersensitivity (James, F. K., et al.), 110
Flunisolide, new synthetic corticosteroid, treatment of ragweed hay fever with intranasal spray containing (Turkeltaub, P. C., et al.), 597
Food(s) allergy, cytotoxic testing for: evaluation of reproducibility and correlation (Benson and Arkins), 471
diagnosis of, by radioallergosorbent test (Chua, Y. Y., et al.), 477
in vivo and in vitro correlates of (Chua, Y. Y., et al.), 299
high spontaneous release of histamine in vitro from leukocytes of persons hypersensitive to (May, C. D.), 432 (Brief report)
immediate hypersensitivity reactions to, in asthmatic children, objective clinical and laboratory studies of (May, C. D.), 500
Fraction A: new immunotherapeutic approach for ragweed pollinosis, *16* (Abst.)
Fungus growth, domestic, appraisal of Impregon as deterrent of (Burge, H. A., et al.), 491

G

Galactosidase immunosorbent test for human immunoglobulin E (Weltman, J. K., et al.), 426
Gamma globulin, reactions to, common variable immunodeficiency with pernicious anemia, asthma, and; treatment with plasma (Ehtessabian, R., et al.), 337 (Allergy grand rounds)
Genetic control of reaginic antibody synthesis; reagin synthesis in inbred rats (Murphey, S. M., et al.), 381
Granulocyte(s), basophil, mediator release from, in chronic myelogenous leukemia (Clark, R. A. F., et al.), 623
lymphocytes and, decreased adrenergic responses in, in atopic eczema (Busse and Lee), 586
Grass pollen(s) allergen, early and late cutaneous allergic responses to (Umemoto, L., et al.), 60
analyses of various species of; cross-reactivity of IgE antibodies with pollen allergens (Leiferman and Gleich), 129
IgE, IgG and patient self tests during slow hyposensitization to, *8* (Abst.)
June, analysis of potency of extracts of, by inhibitory capacities in radioallergosorbent test (Gleich, G. J., et al.), 31
in school children, prevalency of immediate positive skin tests to *Dermatophagoides pteronyssinus* and, *17* (Abst.)
Guinea pig, IgE-mediated anaphylactic bronchoconstriction in, and effect of disodium cromoglycate, *21* (Abst.)
tracheal smooth muscle, human and, comparison of beta-blocking activities of practolol, sotalol, and propranolol in (Adolphson and Townley), 683

H

Hay fever, asthma and, *2, 8, 16, 24, 30* (Absts.)
circulating basophils in normal subjects and in subjects with (Hirsch and Kalbfleisch), 676
ragweed, treatment of, with intranasal spray containing flunisolide, new synthetic corticosteroid (Turkeltaub, P. C., et al.), 597
Herpes simplex virus in man, cell-mediated immunity to; antibody-mediated cell-dependent immune lysis of herpes virus–infected target cells (Russell and Kaiser), 539
Heterozygous alpha-1 antitrypsin deficiency, obstructive airway disease associated with (Johnson, T. F., et al.), 69
Histaminase and histamine methyl transferase, catabolic enzymes, cellular and subcellular localization of, in human leukocytes; histamine metabolism (Zeiger, R. S., et al.), 172

Histamine, acetylcholine, prostaglandin $F_{2\alpha}$, and serotonin after chronic antigen exposure, canine airway responses to (Krell, R. D., et al.), 664
bronchial reactivity to, before and after sodium cromoglycate in bronchial asthma, *37* (Abst.)
changes, plasma, during provoked bronchospasm in asthmatic patients (Bhat, K. N., et al., 647
dependence of eosinophilia, apparently induced by, on acidity; studies in experimental eosinophilia, *25* (Abst.)
high spontaneous release of, in vitro from leukocytes of persons hypersensitive to food (May, C. D.), 432 (Brief report)
human bronchial response to, effect of atropine and albuterol aerosols on (Casterline, C. L., et al.), 607
hypersensitivity in mice induced by *Bordetella pertussis* or pharmacologic beta adrenergic blockade (Matsumura, Y., et al.), 395
and systemic anaphylaxis in mice with pharmacologic beta adrenergic blockade: protection by nucleotides (Matsumura, Y., et al.), 387
metabolism; cellular and subcellular localization of catabolic enzymes, histaminase and histamine methyl transferase, in human leukocytes (Zeiger, R. S., et al.), 172
release, induction of, and desensitization in human leukocytes; effect of anaphylatoxin, *31* (Abst.)
Histologic studies of human skin test responses to ragweed and compound 48/80; effects of alternate-day steroid therapy (Zweiman, B., et al.), 657
Historian's report, American Academy of Allergy, 614
Hospitalization in acute asthma, rapid prediction of need for, *9* (Abst.)
House dust allergy, house dust mite and, *37* (Abst.)
Humoral and cell-mediated immunity, intact, in chronic marijuana smoking (Rachelefsky, G. S., et al.), 483
Hymenoptera insect venoms, immunologic comparison of phospholipases A present in (Nair, B. C., et al.), 101
venoms, diagnosis of allergy to stinging insects by skin testing with, *19* (Abst.)
Hypersensitivity to aspirin-like drugs shown by some allergic patients (Vane, J. R.), 691
cutaneous basophil (Dvorak, H. F.), 229
Hypersensitivity—Cont'd
histamine, in mice induced by *Bordetella pertussis* or pharmacologic beta adrenergic blockade (Matsumura, Y., et al.), 395
and systemic anaphylaxis in mice with pharmacologic beta adrenergic blockade: protection by nucleotides (Matsumura, Y., et al.), 387
immediate, cholinergic nervous system and; eccrine sweat responses in allergic patients (Kaliner, M.), 308
in patients with cystic fibrosis, *5* (Abst.)
imported fire ant (James, F. K., et al.), 110
pneumonitis, activation of complement sequence by extracts of bacteria and fungi associated with, 355 (Correspondence)
experimental, passive transfer of, with lymphoid cells in rabbit (Bice, D. E., et al.), 250
reactions to cromolyn sodium, immunologic components of, *3* (Abst.)
immediate, to foods in asthmatic children, objective clinical and laboratory studies of (May, C. D.), 500
type I, to immunosuppressive agent; generalized urticaria to cyclophosphamide (Lakin and Cahill), 160
Hyposensitization to grass pollen, slow, IgE, IgG and patient self tests during, *8* (Abst.)
therapy with alum-precipitated pyridine extracts in animal dander sensitive patients, *10* (Abst.)
Hypoxanthine major component of fraction with in vivo activity; transfer factor (Tomar, R. H., et al.), 190

I

Ileum-, duodenum-, and colon-specific antigens, *27* (Abst.)
Immune system, IgA, secretory component deficiency, disorder of, *32* (Abst.)
Immunity, cell-mediated, to herpes simplex virus in man; antibody-mediated cell-dependent immune lysis of herpes virus–infected target cells (Russell and Kaiser), 539
in patients with cystic fibrosis, *11* (Abst.)
cellular, levamisole-mediated restoration of, in peripheral blood lymphocytes of patients with immunodeficiency diseases, *19* (Abst.)
intact humoral and cell-mediated, in chronic marijuana smoking (Rachelefsky, G. S., et al.), 483
Immunization, intranasal, with attenuated live influenza vaccine in asthma (Storms, W. W., et al.), 284
Immunochemistry of otitis media with effusion, *14* (Abst.)

Immunodeficiency, common variable, with pernicious anemia, asthma, and reactions to gamma globulin; treatment with plasma (Ehtessabian, R., et al.), 337 (Allergy grand rounds)
diseases, levamisole-mediated restoration of cellular immunity in peripheral blood lymphocytes of patients with, *19* (Abst.)
Immunoglobulin(s) A deficiency, asthma, and respiratory infections (Baker, J., et al.), 713 (Allergy grand rounds)
in one of identical twins, *11* (Abst.)
immune system, secretory component deficiency, disorder of, *32* (Abst.)
E, anti-, early and late cutaneous allergic responses to (Umemoto, L., et al.), 60
antibodies, cross-reactivity of, with pollen allergens; analyses of various species of grass pollens (Leiferman and Gleich), 129
of ragweed and other fall weed pollens (Leiferman, K. M., et al.), 140
human, galactosidase immunosorbent test for (Weltman, J. K., et al.), 426
immunoglobulin G, and patient self tests during slow hyposensitization to grass pollen, *8* (Abst.)
human, binding of, to rat mast cells, *39* (Abst.)
in vitro production of, by human peripheral blood lymphocytes; effect of cholera toxin and β-adrenergic stimulation, *38* (Abst.)
levels, serum, in healthy children quantified by sandwich technique (PRIST), *20* (Abst.)
–mediated anaphylactic bronchoconstriction in guinea pig and effect of disodium cromoglycate, *21* (Abst.)
myeloma presenting with classical myeloma features (Weiner, E., et al.), 373
and patient self tests during slow hyposensitization to grass pollen, *8* (Abst.)
relative paucity of, in human milk, *33* (Abst.)
studies on, in human intestinal fluids, *13* (Abst.)
synthesis in parasite infection (Ishizaka, T., et al.), 523 (Requested manuscript)
4 levels, elevated serum, in cystic fibrosis patients, *31* (Abst.)
isologous, -induced tolerance to benzyl penicillolyl, *20* (Abst.)
synthesis, human, effect of corticosteroids on, *39* (Abst.)
Immunoglobulin(s)—Cont'd
serum, in children with asthma associated with severe respiratory tract infections, *36* (Abst.)
Immunologic(al) characteristics, biochemical and, of culture filtrates from seven isolates; variability of *Alternaria alternata* (Schumacher and Jeffery), 263
comparison of phospholipases A present in Hymenoptera insect venoms (Nair, B. C., et al.), 101
components of hypersensitivity reactions to cromolyn sodium, *3* (Abst.)
inhalation challenge studies; toluene diisocyanate (TDI) pulmonary disease (Butcher, B. T., et al.), 89
reactions, thrombosis, inflammation, and edema, close relationship between, in mediators of inflammation (Ratnoff, O. D.), 438 (Requested manuscript)
studies in case of baker's asthma (Wilbur and Ward), 366
Immunology, *4, 11, 19, 27, 32, 38* (Absts.)
listings, allergy—professional opportunities, 76 (Ad section)
Immunosorbent test, galactosidase, for human immunoglobulin E (Weltman, J. K., et al.), 426
Immunosuppressive agent, type I hypersensitivity to; generalized urticaria to cyclophosphamide (Lakin and Cahill), 160
Immunotherapeutic approach, new, for ragweed pollinosis; fraction A, *16* (Abst.)
Immunotherapy, aeroallergen, nonorganic adverse reactions to (Schatz, M., et al.), 198
for mountain cedar pollinosis (Pence, H. L., et al.), 39
specific, effect of, on reactivity of human T lymphocytes in vitro; allergy to ragweed antigen E, *4* (Abst.)
timothy antigen D, 618 (Correspondence)
Impregon, appraisal of, as deterrent of domestic fungus growth (Burge, H. A., et al.), 491
Infection(s), parasite, immunoglobulin E synthesis in (Ishizaka, T., et al.), 523 (Requested manuscript)
respiratory, asthma, IgA deficiency, and (Baker, J., et al.), 713 (Allergy grand rounds)
Inflammation, mediators of (Ratnoff, O. D.), 438 (Requested manuscript)
Influenza vaccine, attenuated live, in asthma, intranasal immunization with (Storms, W. W., et al.), 284
Inhalation challenge studies, immunologic and; toluene diisocyanate (TDI) pulmonary disease (Butcher, B. T., et al.), 89

Insect(s), stinging, diagnosis of allergy to, by skin testing with Hymenoptera venoms, *19* (Abst.)
venoms, Hymenoptera, immunologic comparison of phospholipases A present in (Nair, B. C., et al.), 101
Insulin, allergic reactions to (Lamkin, N., et al.), 213 (Allergy grand rounds)
Intestinal fluids, human, studies on IgE in, *13* (Abst.)
Isoproterenol infusions, intravenous, management of life-threatening asthma with, *2* (Abst.)
topical saline and, effects of, on nasal airway resistance (McLean, J. A., et al.), 563

J

June grass pollen, analysis of potency of extracts of, by inhibitory capacities in radioallergosorbent test (Gleich, G. J., et al.), 31

L

Learning disabilities, allergy and, in children, *9* (Abst.)
Leukemia, chronic myelogenous, mediator release from basophil granulocytes in (Clark, R. A. F., et al.), 623
Leukocyte(s) glutathione peroxidase deficiency in male patient with chronic granulomatous disease, *24* (Abst.)
human, cellular and subcellular localization of catabolic enzymes, histaminase and histamine methyl transferase, in human leukocytes; histamine metabolism (Zeiger, R. S., et al.), 172
induction of histamine release and desensitization in; effect of anaphylatoxin, *31* (Abst.)
of persons hypersensitive to food, high spontaneous release of histamine in vitro from (May, C. D.), 432 (Brief report)
Leukotactic factors, biological aspects of (Ward, P. A.), 224 (Requested manuscript)
Levamisole-mediated restoration of cellular immunity in peripheral blood lymphocytes of patients with immunodeficiency diseases, *19* (Abst.)
Lung disease, allergic, etiology of, role of precipitins and complement activation in (Olenchock and Burrell), 76
farmer's, coeliac disease with, *40* (Abst.)
Lymphocyte(s) blastogenesis, stimulated, circadian rhythm of (Kaplan, M. S., et al.), 180
Lymphocyte(s)—Cont'd
and granulocytes, decreased adrenergic responses in, in atopic eczema (Busse and Lee), 586
human peripheral blood, in vitro production of IgE by; effect of cholera toxin and β-adrenergic stimulation, *38* (Abst.)
peripheral blood, of patients with immunodeficiency diseases, levamisole-mediated restoration of cellular immunity in, *19* (Abst.)
rosette formation, human T, modulation of, by autonomic agonists and cyclic nucleotides (Grieco, M. H., et al.), 149
T, in atopic children, *36* (Abst.)
Lymphoid cells in rabbit, passive transfer of experimental hypersensitivity pneumonitis with (Bice, D. E., et al.), 250

M

Marijuana smoking, chronic, intact humoral and cell-mediated immunity in (Rachelefsky, G. S., et al.), 483
Meatwrappers' asthma, clinical and bronchial provocation studies in patients with (Andrasch, R. H., et al.), 291
Mediator release from basophil granulocytes in chronic myelogenous leukemia (Clark, R. A. F., et al.), 623
Menthol, case of chronic urticaria due to, *27* (Abst.)
Metabolism, histamine; cellular and subcellular localization of catabolic enzymes, histaminase and histamine methyltransferase, in human leukocytes (Zeiger, R. S., et al.), 172
Mice, histamine hypersensitivity in, induced by *Bordetella pertussis* or pharmacologic beta adrenergic blockade (Matsumura, Y., et al.), 395
systemic anaphylaxis in, hypersensitivity to histamine and, with pharmacologic beta adrenergic blockade: protection by nucleotides (Matsumura, Y., et al.), 387
Milk, human, relative paucity of IgE in, *33* (Abst.)
Mite, house dust, and house dust allergy, *37* (Abst.)
Mountain cedar pollinosis, immunotherapy for (Pence, H. L., et al.), 39
Muscle, bronchial smooth, beta blockade of, in asthmatic subjects, 351 (Correspondence)
tracheal smooth, comparison of beta-blocking activities of practolol, sotalol, and propranolol in (Adolphson and Townley), 683

Myeloma features, classical, IgE myeloma presenting with (Weiner, E., et al.), 373

N

Nasal airway resistance, effects of topical saline and isoproterenol on (McLean, J. A., et al.), 563

Nervous system, cholinergic, and immediate hypersensitivity; eccrine sweat responses in allergic patients (Kaliner, M.), 308

Nucleotides, cyclic, modulation of human T lymphocyte rosette formation by autonomic agonists and (Grieco, M. H., et al.), 149

protection by; hypersensitivity to histamine and systemic anaphylaxis in mice with pharmacologic beta adrenergic blockade (Matsumura, Y., et al.), 387

O

Otitis media, immunochemistry of, with effusion, *14* (Abst.)

Otorhinology and otolaryngology, *5, 14, 28* (Absts.)

P

Parasite infection, immunoglobulin E synthesis in (Ishizaka, T., et al.), 523 (Requested manuscript)

Pathology, pharmacology, physiology, and, *18, 25, 31, 37* (Absts.)

Pediatrics, *2, 9, 17, 24, 31, 36* (Absts.)

Pernicious anemia, asthma, and reactions to gamma globulin, common variable immunodeficiency with; treatment with plasma (Ehtessabian, R., et al.), 337 (Allergy grand rounds)

Pertussis and beta adrenergic–blocking agents, effect of, on mast cells (Guirgis and Townley), 241

Pharmacologic beta adrenergic blockade, histamine hypersensitivity in mice induced by *Bordetella pertussis* or (Matsumura, Y., et al.), 395

hypersensitivity to histamine and systemic anaphylaxis in mice with: protection by nucleotides (Matsumura, Y., et al.), 387

Pharmacology, physiology, and pathology, *18, 25, 31, 37* (Absts.)

Phospholipase(s) A present in Hymenoptera insect venoms, immunologic comparison of (Nair, B. C., et al.), 101

A_2 of bee venom, studies of antigenicity and allergenicity of (Light, W. C., et al.), 322

Physiology, pharmacology, and pathology, *18, 25, 31, 37* (Absts.)

Plasma determinations, peripheral, of prostaglandin E in asthmatics (Alegra, J., et al.), 546

Plasma—Cont'd

histamine changes during provoked bronchospasm in asthmatic patients (Bhat, K. N., et al.), 647

prostaglandins, measurement of, during exercise-induced bronchospasm (Field, J., et al.), 581

use in treatment of common variable immunodeficiency with pernicious anemia, asthma, and reactions to gamma globulin (Ehtessabian, R., et al.), 337

Pneumonitis, experimental hypersensitivity, passive transfer of, with lymphoid cells in rabbit (Bice, D. E., et al.), 250

Pollen allergen(s), cross-reactivity of IgE antibodies with; analyses of various species of grass pollens (Leiferman and Gleich), 129

of ragweed and other fall weed pollens (Leiferman, K. M., et al.), 140

extract, short ragweed, stability of, as measured by skin test and antigen E (Franklin, R. M., et al.), 51

grass, IgE, IgG and patient self tests during slow hyposensitization to, *8* (Abst.)

in school children, prevalency of immediate positive skin tests to *Dermatophagoides pteronyssinus* and, *17* (Abst.)

June grass, analysis of potency of extracts of, by inhibitory capacities in radioallergosorbent test (Gleich, G. J., et al.), 31

Pollinosis, mountain cedar, immunotherapy for (Pence, H. L., et al.), 39

ragweed, fraction A new immunotherapeutic approach for, *16* (Abst.)

Polyether alcohol–polypropylene glycol mixture; asthma due to soldering flux, *24* (Abst.)

Polypropylene glycol mixture, polyether alcohol–; asthma due to soldering flux, *24* (Abst.)

Practolol, sotalol, and propranolol, comparison of beta-blocking activities of, in human and guinea pig tracheal smooth muscle (Adolphson and Townley), 683

Precipitins and complement activation in etiology of allergic lung disease, role of (Olenchock and Burrell), 76

Primates, activity in, against aerosolized *Ascaris suum* antigen, *34* (Abst.)

Professional opportunities, allergy-immunology listings, 76 (Ad section)

Propranolol, practolol, sotalol, and, comparison of beta-blocking activities of, in human and guinea pig tracheal smooth muscle (Adolphson and Townley), 683

Prostaglandin(s), aspirin-like drugs inhibit biosynthesis of, in tissues and species studied (Vane, J. R.), 691
E in asthmatics, peripheral plasma determinations of (Allegra, J., et al.), 546
$F_{2\alpha}$, acetylcholine, histamine, and serotonin, canine airway responses to, after chronic antigen exposure (Krell, R. D., et al.), 664
plasma, measurement of, during exercise-induced bronchospasm (Field, J., et al.), 581
Pulmonary disease, toluene diisocyanate (TDI): immunologic and inhalation challenge studies (Butcher, B. T., et al.), 89
eosinophilia, tropical, adrenaline and, *12* (Abst.)
Pyridine extracts, alum-precipitated, hyposensitization therapy with, in animal dander sensitive patients, *10* (Abst.)

R

Rabbit, passive transfer of experimental hypersensitivity pneumonitis with lymphoid cells in (Bice, D. E., et al.), 250
Radioallergosorbent test, analysis of potency of extracts of June grass pollen by inhibitory capacities in (Gleich, G. J., et al.), 31
diagnosis of food allergy by (Chua, Y. Y., et al.), 477
inhibition, direct RAST and, measurement of relative potency of commercial *Alternaria* extracts by (Yunginger, J. W., et al.), 405
Ragweed-allergic rhinitis, disodium cromoglycate in (Knight, A., et al.), 278
Ragweed antigen E, allergy to: effect of specific immunotherapy on reactivity of human T lymphocytes in vitro, *4* (Abst.)
early and late cutaneous allergic responses to (Umemoto, L., et al.), 60
and compound 48/80, histologic studies of human skin test responses to; effects of alternate-day steroid therapy (Zweiman, B., et al.), 657
hay fever, treatment of, with intranasal spray containing flunisolide, new synthetic corticosteroid (Turkeltaub, P. C., et al.), 597
and other fall weed pollens, analyses of various species of; cross-reactivity of IgE antibodies with pollen allergens (Leiferman, K. M., et al.), 140
pollen extract, short, stability of, as measured by skin test and antigen E (Franklin, R. M., et al.), 51
Ragweed—Cont'd
pollinosis, fraction A new immunotherapeutic approach for, *16* (Abst.)
subjects clinically sensitive only to, relationship of hay fever symptoms and changes in number of circulating basophils studied in (Hirsch and Kalbfleisch), 676
Rat(s), inbred, reagin synthesis in; genetic control of reaginic antibody synthesis (Murphey, S. M., et al.), 381
mast cells, binding of human IgE immunoglobulin to, *39* (Abst.)
Reactions, hypersensitivity, to cromolyn sodium, immunologic components of, *3* (Abst.)
immediate hypersensitivity, to foods in asthmatic children, objective clinical and laboratory studies of (May, C. D.), 500
Reagin synthesis in inbred rats; genetic control of reaginic antibody synthesis (Murphey, S. M., et al.), 381
Renal transplant patients, effects of long-term alternate-day steroids on parameters of adrenal function in, *18* (Abst.)
Respiratory infections, asthma, IgA deficiency, and (Baker, J., et al.), 713 (Allergy grand rounds)
tract infections, severe, serum immunoglobulins in children with asthma associated with, *36* (Abst.)
Rhinitis, allergic, asthma and, risk factors for developing (Hagy and Settipane), 330
perennial allergic, treatment of, with cromolyn sodium (Cohan, R. H., et al.), 121
ragweed-allergic, disodium cromoglycate in (Knight, A., et al.), 278
seasonal, intranasal betamethasone valerate in treatment of, *5* (Abst.)
Rosette formation, human T lymphocyte, modulation of, by autonomic agonists and cyclic nucleotides (Grieco, M. H., et al.), 149

S

Salbutamol and aminophylline, intravenous, comparison of, in severe asthma, *17* (Abst.)
Saline, topical, and isoproterenol, effects of, on nasal airway resistance (McLean, J. A., et al.), 563
Seasonal exacerbation, prevention of, in corticosteroid-dependent patients (Cooper and Patterson), 635
Serotonin, acetylcholine, prostaglandin $F_{2\alpha}$, histamine, and, after chronic antigen exposure, canine airway responses to (Krell, R. D., et al.), 664

Serum immunoglobulin(s) in children with asthma associated with severe respiratory tract infections, *36* (Abst.)
E levels in healthy children quantified by sandwich technique (PRIST), *20* (Abst.)
4 levels, elevated, in cystic fibrosis patients, *31* (Abst.)
Skin test(s) and antigen E, stability of short ragweed pollen extract as measured by (Franklin, R. M., et al.), 51
immediate positive, prevalency of, to *Dermatophagoides pteronyssinus* and grass pollen in school children, *17* (Abst.)
reactions, type 1, to polysaccharide and protein antigens of *Candida albicans*, antibodies mediating, *20* (Abst.)
responses, human, to ragweed and compound 48/80, histologic studies of; effects of alternate-day steroid therapy (Zweiman, B., et al.), 657
testing with Hymenoptera venoms, diagnosis of allergy to stinging insects by, *19* (Abst.)
Smoking, chronic marijuana, intact humoral and cell-mediated immunity in (Rachelefsky, G. S., et al.), 483
Sodium cromoglycate in bronchial asthma, bronchial reactivity to histamine before and after, *37* (Abst.)
effect of, on asthmatic reactions to environmental temperature changes, *2* (Abst.)
in preventing aspirin induced bronchospasm, *30* (Abst.)
Sotalol, practolol, and propranolol, comparison of beta-blocking activities of, in human and guinea pig tracheal smooth muscle (Adolphson and Townley), 683
Stenosis, allergen induced nasal, effect of beclomethasone dipropionate aerosol on, *28* (Abst.)
Steroid(s), long-term alternate-day, effects of, on parameters of adrenal function in renal transplant patients, *18* (Abst.)
therapy, alternate-day, effects of; histologic studies of human skin test responses to ragweed and compound 48/80 (Zweiman, B., et al.), 657
Sweat responses, eccrine, in allergic patients; cholinergic nervous system and immediate hypersensitivity (Kaliner, M.), 308

T

T lymphocytes in atopic children, *36* (Abst.)
Tartrazine dye, drugs containing (Smith and Slavin), 456
Temperature changes, environmental, effect of sodium cromoglycate on asthmatic reactions to, *2* (Abst.)
Terbutaline and epinephrine, acute effects of, on asthma (Schwartz, H. J., et al.), 516 (Brief communication)
Testing, cytotoxic, for food allergy: evaluation of reproducibility and correlation (Benson and Arkins), 471
Tetrachlorsalicylanilide (Impregon), appraisal of, as deterrent of domestic fungus growth (Burge, H. A., et al.), 491
Tetracycline preparation, allergy to—case report, *32* (Abst.)
Thrombosis, immunologic reactions, inflammation, and edema, close relationship between, in mediators of inflammation (Ratnoff, O. D.), 438 (Requested manuscript)
Timothy antigen D immunotherapy, 618 (Correspondence)
Toluene diisocyanate (TDI) pulmonary disease: immunologic and inhalation challenge studies (Butcher, B. T., et al.), 89
Toxin, cholera, and β-adrenergic stimulation, effect of; in vitro production of IgE by human peripheral blood lymphocytes, *38* (Abst.)
Tracheal smooth muscle, human and guinea pig, comparison of beta-blocking activities of practolol, sotalol, and propranolol in (Adolphson and Townley), 683
Transfer factor: hypoxanthine a major component of fraction with in vivo activity (Tomar, R. H., et al.), 190
Twins, identical, IgA deficiency in one of, *11* (Abst.)

U

Urticaria, chronic; case due to menthol, *27* (Abst.)
generalized, to cyclophosphamide: type I hypersensitivity to immunosuppressive agent (Lakin and Cahill), 160

V

Venom(s), bee, allergens in; separation and identification of major allergens (Hoffman and Shipman), 551
studies of antigenicity and allergenicity of phospholipase A_2 (Light, W. C., et al.), 322
Hymenoptera, diagnosis of allergy to stinging insects by skin testing with, *19* (Abst.)
insect, immunologic comparison of phospholipases A present in (Nair, B. C., et al.), 101

Virus, herpes simplex, in man, cell-mediated immunity to; antibody-mediated cell-dependent immune lysis of herpes virus–infected target cells (Russell and Kaiser), 539

W

Weed pollens, fall, ragweed and other, analyses of various species of; cross-reactivity of IgE antibodies with pollen allergens, (Leiferman, K. M., et al.), 140

Wheat flour–sensitive subjects, inhibitory effects of various drugs on dual asthmatic responses in (Nakazawa, T., et al.), 1
